Informed Consent for Botulinum Toxin Treatment

The purpose of this informed consent form is to provide written information regarding the risks, benefits and alternatives of the procedure named above. This material serves as a supplement to the discussion you have with your doctor/health care provider. It is important that you fully understand this information, so please read this document thoroughly. If you have any questions regarding the procedure, ask your doctor/health care professional prior to signing the consent form.

THE TREATMENT

Botulinum toxin (Botox and similar agents) is a neurotoxin produced by the bacterium Clostridium A. Botulinum toxin can relax the muscles on areas of the face and neck which cause wrinkles associated with facial expressions or facial pain. Treatment with Botulinum toxin can cause your facial expression lines or wrinkles to be less noticeable or essentially disappear. Areas most frequently treated are A) Glabellar area of frown lines, located between the eyes; B) Crow's feet (lateral areas of the eyes); C) Forehead wrinkles; D) Radial lip lines (smoker's lines); E) Head and neck muscles. Botox is diluted to a very controlled solution and when injected into the muscles with a very fine needle, it is almost painless. Patients may feel a slight burning sensation while the solution is being injected. The procedure takes about 15-20 minutes and can last up to 3 months. With repeated treatments, the results may tend to last longer. **Initial ____**

RISKS AND COMPLICATIONS

Before undergoing this procedure, understanding the risks is essential. No procedure is completely risk-free. The following risks may occur, but there may be unforeseen risks and risks that are not included on this list. Some of these risks, if they occur, may necessitate hospitalization, and/or extended outpatient therapy to permit adequate treatment. It has been explained to me that there are certain inherent and potential risks and side effects in any invasive procedure and in this specific instance such risks include but are not limited to 1) Post treatment discomfort, swelling, redness, and bruising; 2) Double vision; 3) A weakened tear duct; 4) Post treatment bacterial, and/or fungal infection requiring further treatment; 5) Allergic reaction; 6) Minor temporary droop of eyelid(s) in approximately 2% of injections, this usually lasts 2-3 weeks; 7) Occasional numbness of the forehead lasting up to 2-3 weeks; 8) Transient headache; 9) Flu-like symptoms may occur. **Initial ____**

PREGNANCY, ALLERGIES & NEUROLOGIC DISEASE

I am not aware that I am pregnant. I am not trying to get pregnant. I am not lactating (nursing). I do not have any significant neurologic disease including but not limited to myasthenis gravis, multiple sclerosis, lambert-eaton syndrome, amyotrophic lateral sclerosis (ALS), and Parkinson's. I do not have any allergies to the toxin ingredients, or to human albumin. **Initial ____**

I hereby indemnify Allure Aesthetics & Wellness from any liability relating to procedures that I have volunteered for. I also understand that any treatment performed is between me and the doctor/health care provider who is treating me and I will direct all post-operative questions or concerns to the treating clinician. **Initial ____**

RESULTS

I am aware that when small amounts of purified botulinum toxin are injected into a muscle it causes weakness or paralysis of that muscle. This appears in 2-10 days and usually lasts up to 3 months but can be shorter or longer. In a very small number of individuals, the injection does not work as satisfactorily or for as long as usual and there are some individuals who do not respond at all. I understand that I will not be able to use muscles injected as before while the injection is effective but that this will reverse after a period of months at which time re-treatment is appropriate. I understand that I must stay in the erect posture and that I must not manipulate the area(s) of the injections for the 2 hours post-injection period. **Initial ____**

I understand that this is an elective procedure and I hereby voluntarily consent to treatment with botulinum toxin injections for facial dynamic wrinkles, TMJJ dysfunction, bruxism and types of orofacial pain including headaches and migraines. The procedure has been fully explained to me. I also understand that treatment performed is between me and the doctor/ health care provider who is treating me and I will direct all post-operative questions or concerns to the treating clinician. I have read the above and understand it. My questions have been answered satisfactorily. I accept the risks and complications of the procedure and I understand that no guarantees are implied as to the outcome of the procedure. I also certify that if I have any changes in my medical history, I will notify the doctor/health care professional who treated me immediately. I also state that I read and write in English.

Patient Name (Print) **Patient Signature** **Date**

I am the treating doctor/health care professional. I discussed the above risks, benefits, and alternatives with the patient. The patient had an opportunity to have all questions answered and was offered a copy of this informed consent. The patient has been told to contact my office if they should have any questions or concerns after this treatment procedure.
